Art Unit: 2666

1. Claims 1-7 are objected to under 37 C.F.R 1.75 because of the following formalities:

In claim 1 line 3, " a source node " seems to refer back to " a source node " recited at line 1. If this is true, it is suggested to change " a source node " to --- the source node ---. The same is true with the terms " a destination node " recited in claim 1 ; " a source node " and " a destination node " recited in claim 3; and " each first level router " recited in claim 6.

Claims 2,4,5, and 7 are objected since they depend from claim 1,3, or 6.

2. Claims 4, and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4 line 8, " the barrier transaction " has no antecedent basis. The same is true with the term " said selected number " recited in claim 5.

3. Claims 4-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

4. Claims 1-7 would be allowable if rewritten to overcome the objection under 37 C.F.R 1.75.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Epps et al. (6,778,546 and 6,721,316) are all cited to show systems which are considered pertinent to the claimed invention.
